AI & AUTOMATION PROJECTS

Product Content and Catalog Automation — R1 Industries

- Used ChatGPT within Google Sheets to rewrite Shopify product descriptions for SEO and remove duplicate content. Combined the content workflow with GraphQL inventory retrieval, Excel data preparation, and bulk Shopify uploads to replace manual catalog entry.

AI Assisted Website Development — Utah MMC

- Used Cursor and Claude to create SEO-friendly websites across an eight-company group. Configured Google Ads, GA4, and Google Search Console, and developed a ServiceTitan CRM program, bringing website delivery, marketing measurement, and customer-management systems into the same project scope.

AI Assisted Headless Commerce Development — Vortex

- Developed a headless React and Next.js e-commerce website with assistance from Cursor, Codex, Claude, and Gemini. Connected Shopify to manufacturer databases and automated order and shipping updates through GraphQL integrations. Designed the operational system for roughly 10 minutes of weekly oversight once running.

Construction Site Prospecting System — Utah MMC

- Developed a construction-site prospecting system with Cursor and Claude, using government satellite imagery to identify work sites, equipment in use, and potential service or equipment-rental opportunities. Applied the observations to determine which services and rental equipment the company could offer.

AI Assisted Promotion and Performance Analysis — 1-800 Contacts

- Analyzed AI-assisted promotion performance using Namogoo alongside paid-media bidding, audience, attribution, incremental CPA, and customer lifetime-value analyses. Evaluated these areas as part of a broader marketing-analysis program that included Performance Max and Google Shopping performance, affiliate commissions, and predictive projections.

SELECTED RESULTS

- Managed up to $30 million per month in paid media with a four-person team at TravelPass Group, supporting high-volume account operations and disciplined budget oversight.
- Scaled monthly marketing volume from approximately $200,000 to $800,000 while improving ROAS from 1.5 to 3.5 through bidding, audience, budget, campaign, and conversion optimization.
- Managed 75+ Google Ads accounts with more than $276,000 in combined monthly spend while advising clients on channel allocation, campaign structure, and growth priorities.
- Managed 150+ campaigns with approximately $400,000 in monthly spend, generating more than $9 million in revenue and approximately 35% of company sales.

PROFESSIONAL EXPERIENCE

Marketing Strategist/Analyst - 1-800-Contacts - Draper, UT Nov 2022–Jun 2023

- Built automated weekly reporting across 10+ channels using Python, Databricks, SQL, blended Excel data, and Funnel.io to improve accuracy and decision speed.
- Analyzed max CPC versus smart bidding, brand CPC optimization, non-brand target CPA, Performance Max and Google Shopping mix, audience performance, data-driven attribution, incremental CPA, lifetime value, affiliate commissions, and AI-assisted promotion performance using Namogoo.
- Used regression models, holdouts, geo tests, scale-up/down analysis, and budget reallocation scenarios to forecast outcomes and present credible investment recommendations.

Director of Digital Marketing - GRIP6 - Midvale, UT May 2022–Jan 2023

- Increased monthly volume fourfold while improving ROAS from 1.5 to 3.5 through bidding strategy, audience analysis, campaign testing, budget allocation, and conversion review.
- Configured GA4 and Google Tag Manager measurement and built Looker Studio KPI dashboards for campaign pacing, website performance, inventory planning, and leadership decisions.
- Consulted on SEO best practices and on-page optimization and coordinated marketing priorities with web, operations, creative, and other stakeholders.

Digital Marketing Manager - TravelPass Group - South Jordan, UT Aug 2021–Apr 2022

- Managed up to $30 million per month in paid media with a four-person team at TravelPass Group, supporting high-volume account operations and disciplined budget oversight.
- Automated SERP analysis with Python and used machine-learning models and the Google Ads API to support budgets, bids, ad copy, keyword decisions, and other optimizations.
- Automated keyword creation and permutations for thousands of ad groups using VBA in Excel.
