Professional Summary

My greatest strengths are centered around technology and marketing. I've always loved technology. I have a broad understanding of most technologies, and an exceptionally in-depth knowledge, and years of formal training and experience in many computer and online technologies. I've been involved in some type of technology/marketing position for more than 14 years. I am equally passionate and experienced in marketing. I've managed the online marketing departments at several different companies, and successfully marketed a unique company I founded in college. I was on a team that won the Entrepreneur of the Year Award while in college with the combined use of the aforementioned strengths and passions. I was also the leader of a team that won the Regional Business Plan Competition the following two years in a row.

Most importantly, I am a quick learner. In the marketing and technology industries that is crucial because things change every day. I am constantly teaching myself new things and always look for different opportunities.

Upon examining the resume I've sent, I'm confident you will see I not only meet the requirements for this position, but that I can provide additional value as well. My resume is very detailed and job-specific which will show proven successes in the past. I can send you a portfolio containing some of the sample work I've done, if needed. This will demonstrate the quality and breadth of skills and abilities I can currently provide your company.

Sincerely,

Dave Call

Work Experience

Dave Call - Computer Technology Skills

January 2006 to Present

Computer & Technology Skills

- Exceptional understanding and several years of formal training and experience in Excel, Marketing Databases, VS Code, Photoshop, InDesign, Illustrator, Salesforce, all communication software (e.g. Slack, MS Teams), multiple ERP systems, and many other applications
- Proficient in Python, HTML5, CSS3, JavaScript, Git, XML, PHP, SQL, VBA, and similar technologies
- Years of experience with Google Ads, Facebook (Meta) Ads, Instagram, LinkedIn, TikTok, Pinterest, SnapChat, etc
- Google Analytics (GA4 and UA), GTM (Google Tag Manager), Google Keyword Planner, Search Console, Google Trends, HubSpot, Shopify, Magento, WordPress, Tableau, Adobe Analytics, Google Ads API, Moz, SEMrush

- Statistical modeling, process automation, machine learning, data visualization, ChatGPT input engineering, AI marketing tools

Marketing Strategist/Analyst

1-800-Contacts-Draper, UT

November 2022 to June 2023

- Examples of analysis projects: analyzed max CPC vs smart-bidding, omni-channel brand-holdouts, CPC optimization for Brand, non-brand target CPA, AI-assisted promotion analysis using Namogoo, incremental CPA analysis on scale-up/down, audience analysis in Google Ads to test and apply to other platforms, Data-Driven Attribution analysis (DDA), Lifetime Value of Customer (LTV) analysis, affiliate commission analysis and discount negotiation, Performance Max/Google Shopping mixture analysis, 5-year projections using predictive, statistical models, etc
- Funnel testing for reach, comparison, conversion (micro-included), and then internal LTV testing, Click-to-Call systems assessment, iSpot Analysis for TV/OTT (reach) campaigns
- Built complex Tableau dashboards for Paid Search (Google Ads, Bing Ads, etc). I helped convert their Power BI dashboards to Tableau. We switched for a very specific reason
- Used Python, DataBricks, SQL, Excel (blended data), and Funnel.io to create a customized reporting system that automated and ensured accuracy to all of the marketing channels we have. It collected data automatically from 10+ channels (platforms) on a weekly basis
- After success with optimization, the question was posed by management, "If we were to give you an additional \$10 million dollars, where would we invest it, and why"? Using regression models based on previous year and previous periods, we were able to very accurately predict the outcome of the types of tests we used: hold-out, geo-promotional offers, scale-ups, scale-downs, reallocation of funds to different channels, etc.

Director of Digital Marketing

GRIP6-Midvale, UT

May 2022 to January 2023

- Managed all marketing platforms: Google Ads, Bing Ads, Amazon, Facebook, Instagram, and TikTok with a 400k/month budget
- Successfully achieved goals which were to get 4 times the volume (800k/month) at a 3.5 ROAS (return on ad spend). Our marketing campaigns before I started were at 200k/month at a 1.5 ROAS
- Setup KPI's in Google Looker Studio for different departments to provide transparency. This helped with inventory planning, engineering processes based on reviews, management decisions, website development, email efficacy, and cross-platform budget management
- Consulted the Webmaster on SEO best practices and on-page optimization
- Setup custom reporting in GA4 using custom Google Tag Manager configurations
- Created a inventory planning methodology with a custom robust spreadsheet used by the multiple departments

Director of E-Commerce/Marketing

Intercon Inc.-Salt Lake City, UT

February 2018 to April 2022

- Managed all aspects of e-commerce and marketing at a very large distributor (B2B)
- Technology, marketing, cultural change, team, and thought leader
- Setup the company's informational architecture (ERP systems flow)
- Innovated and implemented new systems to increase productivity and efficiency
- Created systems to allow for transparency and collaboration
- Oversaw project management in an ever-changing environment
- Worked with all heads of department (IT, Operations, Finance, Product Dev, HR, Sales, etc)
- Lifted the company up from a very non-digital, traditional B2B distributor to a functional digital environment
- Expanded their business by adding a new B2C element (multiple e-comm platforms) while not encroaching upon our 650+ retailers (B2B)

- Developed e-comm specific products with our manufacturers and developed better supply chain processes
- Worked extensively with Amazon Vendor and Seller Central (FBA and FBM) leading to other consignment initiatives (CastleGate, Target.com, Costco.com etc.)
- Conducted financial analysis on a daily basis to find niches and develop products
- Managed a virtually unlimited budget based on a project by project cost/benefits analysis
- Developed and maintained the company's multiple databases to ensure consistency among departments, and used them to create proper and accurate financial and marketing reports

SEM Manager/Project Manager

The Infinite Agency - www.theinfiniteagency.com-Dallas, TX

September 2016 to February 2018

The Infinite Agency - www.theinfiniteagency.com

- Setup and managed more than 75 Ad Words accounts with a total spend of more than \$276,000 per month
- Strategized directly with clients on how to best distribute their marketing funds based on their business needs into different channels including: website development, SEO, email campaigns, Google Ads search, display, mobile, re-marketing, and YouTube campaigns, and all social media platforms
- Studied each client's account using industry leading analytical software to make data-driven recommendations
- Created reports using Funnel.io to consolidate data sources and presented that data with Google Data (Looker) Studio
- Created custom scripts to allow automatic and constant monitoring of all clients marketing efforts
- Developed a custom Ad Words system providing quality on quantity, ensuring the same quality of service for all clients, no matter what the client's spend. This system was adopted by the entire company
- Created conversion and attribution models and created multivariate tests on all levels

E-Commerce Manager

LifeSpan Fitness - www.lifespanfitness.com-Salt Lake City, UT

July 2014 to September 2016

- Managed the E-Commerce department comprised of 8 best-in-class employees
- Managed all paid search campaigns, outreach, lead generation, and customer acquisition for a large E-Commerce company in the United States, Canada, and the UK
- Managed large AdWords, Bing Ads, Gemini, and Amazon Marketing Services accounts consisting of more than 150 campaigns with a \$400,000 budget resulting in more than \$9,000,000 in revenue (35% of total revenue)
- Conducted advanced keyword research, channel analysis, monitored trends, created custom attribution models, acquisition analysis, conversion path and funnel analysis, landing page optimization, A/B multivariate testing, conversion rate optimization (CRO), created advanced bid strategies and testing, setup bid experiments, created an affiliate program strategy, and created ad copy for search and display ads using Adobe design software
- Setup human assisted automation with JavaScript on certain campaigns based on promotions and business goals
- Created business goals, yearly projections, and KPI's with senior management and reported large quantities of data from Magento, Google Analytics, ACCTivate, and QuickBooks
- Conducted competitive analysis to improve and position our campaign performance
- Managed display, mobile, re-marketing, search, video, email, shopping, and social, local, and CRE campaigns
- Performed advanced analysis using Excel, AdWords Editor, Bing Editor, and Amazon Premium Analytics
- Worked with the web development team and monitored SEO/SEM using a variety of software tools
